Hi Jeff, apologies for not getting back with you earlier. I'm in Seattle this week doing several audits so I have been behind on my emails. I can give you a call this afternoon around noon one. Will that time work for you?

Lana

Hi Jeff-

It was nice meeting you last week. Thanks for joining us at the meeting.

To follow up with you on a few of the DMR questions we had; have you had a chance to run down the follow questions?

- Can Shell submit paper DMRs rather than using the NetDMR? Due to the complexity and staff shortage for getting the system set up for the new permit we thought paper DMR over the NetDMR system may be the best choice for at the beginning of the season. However, according to the permit language, it doesn't look like paper DMRs are acceptable for the Chukchi permit. Have you had a chance to determining what the path forward should be?

- What information do you need from Shell so that EPA can build the NetDMR database? In the past there have been some delays in getting the database built and Shell does not want to be late in submitting netDMRs.

Hi Lana – I have an all-day meeting on Wednesday. Can we talk over the phone later this week. I assume you are looking for general information about how to register and get set up in NetDMR? My data manager just retired and I'm in the process of bringing in a backup. In the meantime, I've been fielding questions and attempting to keep things flowing. EPA HQ has developed some training materials. Might be good to start there. I've included a link to the information.

Hi Jeff-

I received an out of office notice from Diane Davis. Would you or one of your staff members be willing/able to meet with me on Wednesday 3/18/15? I'm open from 10-12 and after 3pm. I release this is short notice I just thought meaning I'm down there I should try to connect with Diane to discuss our DMR set-up structure for reporting under the new NPDES permit.

Please feel free to contact me if you have any questions.

Thanks-

Lana

Hi Diane-

Hope all has been going well with you. I wanted to check in with you to see if you noticed that Shell submitted a few NOI a couple months again. I was wondering whether you had started reviewing the content of our NOI packet for building up the NetDMR files. I'm going to be in Seattle next week and if you have sometime and are available to sit down and talk with me about what we need to do as far as next steps for reporting through the NetDMR system let me know. I do know we'll be submitting new Signatory authorization requests for couple new people but besides that I would just like to make sure we're identified everything we need given the number of NOIs we submitted and the two drill ship / rig and with the new EMP sampling requirements. How is that all going to look for reporting through the NetDMR?

I have most of Wednesday open if you're available to discuss further let me know. I have a meeting in your building between 1-3 any other time on Wed would work for me.

Thanks

Lana
